

Course Description

In this course participants will learn how to develop a roadmap for progress toward the National Preparedness Goal by facilitating the development of resilience considerations and involving essential community critical infrastructure partners. Participants will learn how to formulate considerations for the resilience of community assets that leverage cross-sector partnerships. These considerations enhance the whole community's ability to manage the risk associated with critical infrastructure protection efforts. Participants will have an opportunity to practice the practical skills necessary to formulate considerations in the local community.

Individuals completing this course in combination with MGT310, MGT315, and AWR213, are awarded the [TEEX Infrastructure Protection Certificate](#).

This course meets Texas Commission on Law Enforcement (TCOLE) requirements for MGT414 Advanced Critical Infrastructure Protection course #78400.

Prerequisites

There are no prerequisites for this course.

Attendance Requirements

Class attendance is an essential part of the education process, and participants in TEEX courses are expected to attend all class sessions and field exercises. The course requires participants to attend a minimum of 80% of the class hours as a component of successful course completion. During the course, your instructor will review any additional attendance requirement, for example a field exercise that cannot be missed.

Participants in a TCOLE credit course must complete the class in its entirety to receive TCOLE credit.

Topics

- Understanding your community
- Understanding community lifelines
- Concept of resilience
- Assessing and analyzing risk
- Senior leaders brief

Suggested Audience

- Law enforcement
- Fire service

- Emergency medical
- Emergency management
- Hazmat
